📍 Luján de Cuyo, Mendoza Argentina

LANGUAGES

- Spanish: Native proficiency.
- English: B2

PROFILE

I am a technology enthusiast and constantly learning web developer. I am equally attracted to frontend and backend development, exploring new technologies for innovative solutions. While my current focus is on backend development, I am open to projects that involve both areas. I am willing to collaborate on challenging projects and continue to grow professionally.

EXPERIENCE

08/2023 - Present (Buia&Flama) (React-Node.js-Css-MongoDB)
Design and development of corporate websites for clients, focusing on web applications and landing pages in collaboration with the design team.

11/2023 - 01/2024 (Freelance) (React-Express-PostgreSQL)
Development and design of a control panel for managing products and tasks, with user roles, security, and customization.

08/2023 - 09/2023 (Freelance) (Html-Css-Typescript)
Development and design of a corporate website for UVI, a human resources company.

04/2023 - 06/2023 (Next.js-Styled-components-Airtable-firestore)
Development and design of end-to-end Backend and Frontend solutions for e-commerce platforms.

10/2022 - 12/2022 (React-Algolia-Mapbox-Node.js)
Development and design of a web application focused on the notification and reporting of lost pets.

05/2022 - 06/2022 (Html-Css-Javascript)
Development and design of a product search engine based on the integration of the Mercado Libre API.
